

Fulfilling the demands of interested parties in accordance with the terms and deadlines agreed.

CORE OBJECTIVES

- Long-term business success.
- The product and the service is done well for the first time and each time.
- Continual improvement of efficiency in the business process.
- Reduce costs of poor quality.

RESPONSIBILITY OF MANAGEMENT

In order to achieve quality process output we need to create suitable quality process input. Therefore the company management is investing its efforts in:

- maintaining and developing key knowledge in the field of development, design, manufacture, testing and servicing of energy and special transformers and competence of employees,
- creating a modern working environment and providing appropriate technical equipment,
- motivating its employees to accurately carry out their tasks,
- meeting the demands of legislation, standards and other regulations pertinent to the business process of the company,
- keeping the interested parties informed about the quality policy,
- providing strategic plan and annual plans,
- monitoring and analysing the business environment to identify new requirements, any changes and the risks involved to be able of quick response and adjust to new circumstances,
- monitoring business results to ensure the conditions in which the business process is controlled, reliable and repeatable, and that the results are properly evaluated,
- continually looking for opportunities to improve the business process.

RESPONSIBILITY OF EMPLOYEES

Every employee is personally responsible for:

- for acting in accordance with the quality policy,
- careful and economical handling of working tools and equipment,
- continually looking for opportunities to improve the work process.

Quality Policy of the company is being periodically reviewed and updated when needed.
